

Berrin CAYIRLI

Salesforce Developer

SUMMARY OF EXPERIENCE

- Results-driven Salesforce professional with 2 years of experience in developing, configuring, and administering Salesforce applications. Proven track record of designing and implementing solutions that meet business requirements and improve overall efficiency.
- Experience in Process Builder, creating Custom objects, Profiles, Permission sets, Page layouts, Validation rules, Record types, Approval Processes, Flows, Apex classes, Apex triggers, Asynchronous apex, Apex Unit Test, Lightning component, Rest API, LWC for automating business logic etc.
- Analyzed requirements and provided solutions for data model, objects, fields, relationships, and business processes
- Managed Salesforce sandboxes for development, testing, and deployment of data and metadata between environments

PROFESSIONEL EXPERIENCE

September 2022- March2023
Developer
SPECTRUM PSYCHIATRY, LLC OH 45040 USA

- Developed and implemented Apex Classes, Triggers and Unit Test to implement business logic.
- Developed a reusable Apex Class which contains a method to insert the Error log Object records. This method contains the parameters to get the dynamic details of the fields (Log Date/Time, Log Details & Process Name).
- Created a batch apex that marks the campaigns as Expired after passing the End Date.
- Proficient in possessing a solid foundation in JavaScript, HTML, and CSS, which are the core technologies used in LWC development.
- Implemented REST API and SOAP API as web interfaces to access Salesforce data
- Expert in using SOQL and SOSL to retrieve and update data from Salesforce objects, including custom objects and junction objects.
- Developed custom Salesforce flows using declarative tools to automate business processes and increase efficiency.
- Created flow automation to send emails for successful/failed donations.
- Developed and implemented Flows, workflows and approval processes for opportunity and product management.
- Implemented agile management ideas and participated in sprint reviews and daily Scrum meetings to align with Agile practices of the organization
- Used Jira to manage issues, track progress of tasks and to work in collaboration with the team to meet project objectives
